

STAINLESS STEEL PRODUCTS

>>> FIELD OF APPLICATION

- Chemical, pharmaceutical, nuclear, agri-food industries, etc.
- Salt, sugar, encapsulated flavours, biscuits, crumbles, praline, talc, chlorine, washing powder, ammonium nitrate, surface treatment powders, fertilisers, etc.

>>> TECHNOLOGIES USED

All technologies supplied by MECAROANNE can be produced in stainless steel.

>>> DESIGN

- The smaller units are made entirely of stainless steel.
- For larger units, generally only the parts in contact with the product are made of stainless steel; primarily the grinding tools and a liner in the grinding chamber.
- Different grades are available, 304L, 316L, etc., as well as other more technical grades for grinding tools.
